# Center for Research Informatics (CRI) Price Guide

Effective July 1st, 2024, all service lines of the Center for Research Informatics are now operating within a federal recharge center. This transition was implemented to sustain services supported or subsidized by federal awards and ensure compliance with federal regulations outlined in University Policy 1005.

CRI services are partially subsidized by generous support from the BSD Dean's office.

We are dedicated to meeting your specific requirements and will work closely with you to align timelines and costs with your project goals. See our current approved hourly rates below, these rates will not affect the ability to direct charge to grants. Please note that recharge rates are subject to annual review and may change each fiscal year.

**BioCore FY25 Recharge Service Rates, effective July 1, 2024:**

| Product/Service Description | Per Unit | Approved Internal Rate | Approved External Affiliated Rate | Approved External Academic Non-Profit Rate | Approved External Commercial Rate |
|---|---|---|---|---|---|
| Bioinformatics Analysis | HOUR | $150.00 | $150.00 | $266.00 | $300.00 |
| Consulting | HOUR | $150.00 | $150.00 | $210.00 | $300.00 |
| Application Development | HOUR | $150.00 | $150.00 | $210.00 | $300.00 |

**BioCore Service Descriptions, effective July 1, 2024:**

| Service | Service Description |
|---|---|
| **Bioinformatics Analysis** | Bioinformatics analysis of high-throughput biological data, including proteomics, using our well-defined analysis pipelines; should an Biocore employee be included on a grant for these services, initial consultation, grant, and manuscript writing fees will be bundled with effort on the grant. 1 hour of consultation time is provided at no charge. |
| **Consulting** | Consultation services are all activities related to grant or IRB writing assistance, cost analysis, letters of support, documenting the availability of tools, data, and expertise for any project, and developing or amending a service level agreement. Consultation services also include manuscript writing assistance, including assistance writing the components and methodology for publications derived from CRI affiliated work. Consultation services include ongoing support for application development. 1 hour of consultation time is provide at no charge. |
| **Application Development** | Application Development includes creating a computer program or a set of programs to perform the different tasks.
